

DC EARLY CHILDHOOD EDUCATION BUSINESS COLLABORATORY

THEORY OF ACTION IN SUPPORT OF THE ECE BUSINESS COLLABORATORY THEORY OF CHANGE

If we...

Provide competency-based best business practice training and technical assistance supports to child care businesses.

Then we will...

Increase the sustainability and capacity of DC's child care businesses to understand their costs and revenues, market their program to families and develop sustainable budgets that effectively access and leverage public and private resources.

And ultimately...

Child care businesses will have the business competencies and supportive ecosystem and policies to enable operation of thriving child care businesses that meet the diverse needs of the District's children and families; attract, retain and develop exemplary staff; and support the development and thriving of young children, families and early educators.
